

**Amendments to the Specification**

Please amend the paragraph of page 5, lines 2-19 of the text as follows:

In addition, a polymer known as thermoplastic elastomer (TPE) may be employed in the present invention. Examples of TPEs include styrene TPE comprising polystyrene serving as a hard segment, and polybutadiene, polyisoprene, or ~~poethylen~~ polyethylene-polybutylene serving as a soft segment; olefin TPE comprising polypropylene serving as a hard segment and EPDM (ethylene/propylene/diene monomer rubber) or EPM (ethylene/propylene monomer rubber) serving as a soft segment; urethane TPE comprising polyurethane serving as a hard segment and polyether or polyester serving as a soft segment; ester TPE comprising polyester serving as a hard segment and polyether or polyester serving as a soft segment; PVC-TPE; butyl rubber graft polyethylene comprising polyethylene and butyl rubber; 1,2-polybutadiene comprising 1,2-syndiotactic polybutadiene and amorphous polybutadiene; trans-1,4-polyisoprene comprising trans-1,4-polyisoprene and amorphous polyisoprene; an ionomer comprising metal carboxylate cluster and amorphous polyethylene; and natural rubber TPE comprising polypropylene and natural rubber.

Please amend the paragraph of page 15, lines 8-16 of the text as follows:

Castor oil serving as a medical ingredient (B) (5 parts by weight) was added to linear low-density polyethylene (~~Ultrex~~ ULTZEX 15100, product of Mitsui Chemicals, Inc.) (80 parts by weight) and very low density polyethylene (DFDB9042, product of Nippon Unicar Co., Ltd.) (20 parts by weight), serving as resin (A). The resultant mixture was melted at 170° C and kneaded, and then shaped at 200° C by use of a T die, to thereby produce the sheet of the present invention having a thickness of 30  $\mu$ m.

Please amend the paragraph of page 15, lines 22-24 of the text as follows:

Appln No. 09/623,485

Reply to the Office Action of May 25, 2004

A sheet having a thickness of 20  $\mu\text{m}$  was produced by use of linear low-density polyethylene (~~Ultrax~~ ULTZEX 15100, product of Mitsui Chemicals, Inc.) serving as resin

(A).

Please replace the table at page 18 with the following table:

Table 1
